

The Salvo Loading Dock Safety System

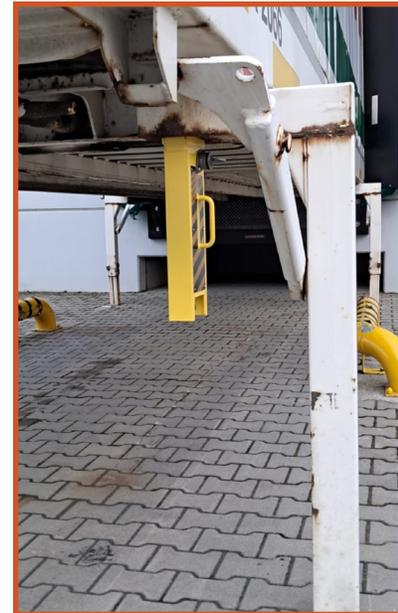

A complete solution for safeguarding swap body trailers from accidental drive-aways

The Salvo Loading Dock Safety System is designed to prioritise safety, utilizing trapped key interlocking principals to force a sequential process of operations to safeguard against accidental drive aways and keep personnel safe. A game-changer for facilities of all sizes, the Salvo Loading Dock Safety System is unique in that it offers a wide range of vehicle compatibility, including swap body trailers - making it the perfect solution for your facility.

How it works

To safeguard swap body trailers from premature movement at the loading dock, our Loading Dock Safety System combines our patented key transfer technology with a high-quality Salvo Swap Body Lock, designed to secure parked swap bodies at the loading dock.

The Salvo Swap Body Lock is applied to the trailer, obstructing the twist lock aperture. Once applied, the key is removed and inserted into the Salvo Control Panel. The key is now trapped, and the door can be opened, and safe loading or unloading can begin. When loading operations are complete, and the door is closed, the key is released and can be removed from the control panel. It can then be inserted back into the swap body lock to remove the device and safely depart.

Key benefits

Safety

The Salvo Loading Dock Safety System protects swap bodies from unauthorised movement, safeguarding against accidental drive aways and keeping personnel safe.

Versatility

Salvo offers a range of loading dock safety solutions for all vehicle types, locking swap bodies, containers, and more.

Good return on investment

Investing in the Salvo Loading Dock Safety System will make for favorable safety-related gains, especially given that there are no costs for maintenance or servicing.

Easy to use & low maintenance

The Salvo Loading Dock Safety System is easy to install, there are no modifications required, and it is low maintenance - saving facilities time and money.

Reliability & longevity

The Salvo Loading Dock Safety System is extremely durable and will withstand the rigors of frequent use.
